It is better for you to pass an evening once or twice a week it a lady's drawing room, even though the conversation is rather slow, and you know the girls' songs all by heart, than in a club, tavera, or if a pit of a theatre. All amusements of youth, to which women are not admitted, rely on it, are deleterious in their nature. All men who avoid temale society have dell perceptions, and are stapid, or have stupid or gross tastes, and revoit against what is pure. He then withdrew from the service, and devoted himself for a time to the study of painting, especially of marine pieces. His first novel, written at the achietation of his friends to embody his experience of travel in a book, was called "Kernoch the Pirate." It met with moderate success and encouraged him to make further experiments with his pen. "A lar Gall" appeared in 1831, and the "Salamander" in 1832. He then turned his hand to history, and wrote an secount of the French navy under Louis AIV, which was published in five volumes in 1835-37. After an interval of about six years, during which he wrote several popular fictions, his famous "Mysteries of Paris" was bisued from the press and at once gave him a high rank among modern French novelists. "The Wandering dew," which was first published in 1845, produced a profound impression and was widely read and translated into several different languages. This was followed by the Democratic Socialist party in 1851 to the National Assembly, where he did not much distinguish himself. For his part in the affair of December, 1851, he was banished from the country, and resided for some time in Italy.
